YOUR COMMENTS ON THE CASE

Please provide your representation below.

Regarding the appeal for drilling in Borrás for the future prospect for unconventional gas extraction by the above party. I am writing in favour of rejecting any decision to let this company proceed with their intentions. I believe the drilling could eventually lead to permission from fracking which as yet there has been too little research into the implications of this process on the surrounding environment and society. Current government regulations do not yet provide another protection from threats such as contamination of water supply and land; the air and noise pollution from flaring, waste water and heavy traffic on the roads. There is also no evidence that this process will provide the perceived benefits of energy independence and more jobs in the area. Please would you reject this application until there is absolute certainty that this process will be of benefit to the local environment and community.
