Dear Sir/Madam,

I am writing concerning planning reference: P 2013 0660; Welsh government reference: H6955/A/14/22/0276. It is extremely concerning to myself that GP Energy has decided to appeal against the decision of Wrexham County Borough Council to turn down their application for fracking.

I have been researching the experience of other countries, such as the US and Australia with fracking. It is horrific, the effect that exploratory drilling for coal bed methane has had on the people, livestock and environment. I would beg you, as a citizen of north Wales ~~not~~ not to let this happen to our beautiful land. Perhaps you think this will help financially, but it would be such an instant hit, with terrible long-term effects to the area. The people of Wrexham do not deserve to have their water polluted, their livestock poisoned or their environment destroyed. Please think further ahead and reject the appeal of these greedy corporations who only have the interests of their own profits, rather than the people.
People before profits!

Yours Sincerely

EFA THOMAS
