I totally disagree with the decision made by planning to refuse retrospective planning permission for UPVC windows at No 2, Chapel Street.

How can the council refuse planning when house No. 4, 5 & 6 already have near identical UPVC windows? No 2 has tried very hard to maintain the appearance of the original timber frame sash windows with great success.

The windows are in no way detrimental to the character or overall appearance of the house, and look 100% better than the old wooden windows which are still in place in No 1 & 3 Chapel Street. These wooden windows look shabby and unkept and in my opinion, lower the tone of the row of terraced houses.

I feel that the style & design of the UPVC windows at No 2 has certainly gone a long way to preserve and enhance the character of the house and therefore in turn maintained the character of the row.

I hope the retrospective planning permission is granted and that a sensible view is taken over this matter.
