OPPOSITION TO THE APPEAL

YOUR COMMENTS ON THE CASE

Please provide your representation below.

Mr Forrester does not live in the area and is simply a property developer aiming to seek personal gain, with no regard whatsoever for the local environment or community, or safety and wellbeing of same.

There have been numerous planning applications made over the 9 years we have resided in Horseman's Green, and indeed some prior to this, the general feel in the Hamlet is that of being 'ground down' due to the incessant nature of it.

We have attached our latest letter dated 16th June 2012, and in relation to the last application, again culminating in planning refusal.

Additionally, we would like to bring your attention to recent developments :

There is a huge issue in the local area associated with overloaded drains. There is no surface or foul water mains drainage and therefore the Hamlet is prone to flooding. Ditches at the side of the road are normally full of water, with no apparent suitable place for them to drain away. We have not yet entered the Winter season however we are already experiencing associated problems.

During the month of September Mr Forrester arrived in the Hamlet and spent a few hours cleaning out the drainage ditch adjacent to the land in question, he also laid some hard core material at the field entrance.

Immediately subsequent to this we experienced a heavy shower and shortly afterwards the gateway and road outside the field were flooded, with ditches and drains unable to cope. To be in this situation at the end of the Summer months is concerning enough, worse is to come as we approach the Winter months.

Should additional buildings (c/w kitchen and toilet block) be built in this area then this would exacerbate the overload problem, culminating in further flooding and an increased safety risk.

The Wrexham Development Plan has stated that there should be no further development in the Hamlet due to the aforementioned poor drainage or until mains drainage is installed. Allowing the appellant planning permission in this respect would 'fly in the face' of the Development Plan and it's intent.

**Section 78 Appeal at : Land South of Boundary House, Horsemans Green Road,
Horsemans Green, Wrexham – Erection of Stable Block and Store, Kitchen, Toilet
Block**

Dear Sir/Madam,

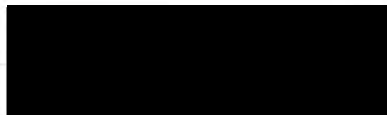

We write to you to make representation in relation to the above referenced appeal.

In order to provide some background, the appellant has made a whole range of separate applications over a number of years, and for buildings ranging from a single stable block through to a general purpose agricultural building.

We enclose our last letter dated 16th June 2012, along with a completed 'comments on case' form.

You are welcome to contact us at any time relating to the information as supplied, and to discuss our concerns relating to this continual struggle.

Yours Sincerely

Mr M. & Mrs GM. Chaplin

Planning Ref : P/2012/0380
Erection of Stable Block & Store, Kitchen, Toilet Block - Land South of Boundary
House, Horseman's Green

Dear Sharon,

We write to you in connection with the above referenced planning application, and wish to advise our thoughts and concerns.

Firstly we would like to draw your attention to the fact that the applicant has consistently attempted to seek permissions over past years, and for buildings ranging from a single stable block through to a general purpose agricultural building.

You should have our previous responses outlining our thoughts and concerns on file, however for clarity we would advise as follows :

Upon reviewing the proposal and supporting documentation it would appear that this would not be in keeping with the overall appearance of the area, and especially the existing residential dwellings.

We would question the proximity of the proposed building to the boundary limit, and would also point out that there is a public footpath running through the area in question.

We receive a lot of rainfall in the general area, and that particular part of the village floods on numerous occasions especially during the winter months. We can only assume that this situation would be exacerbated should that area be developed.

Any site access to this area would prove problematic given the proximity of the access way opposite the bend in the road and the turning/junction a matter of only yards from

the current site access. We consider this a potential safety risk to all road users and to pedestrians.

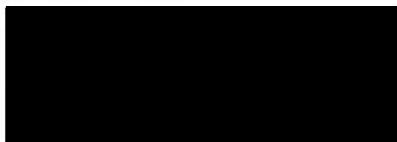

There are no sewers in that part of the village, careful consideration would need to be given in this respect.

The local area has, until now, been a safe haven for young children to play due to it's inherent situation with regard to low volumes of traffic. Our fears are that this situation would change due to the increased amount of traffic should a development application be successful.

Country roads and lanes can be particularly dangerous due to the extent of earth, etc deposited by farming machinery. We would expect this situation to worsen under any proposed development scheme.

In conclusion, we consider that this type of proposal is wholly inappropriate for our village from an aesthetical perspective, from a safety viewpoint, due to concerns relating to unwanted noise in a residential area, and due to the impact on our already overloaded drains.

Yours Sincerely
