Dear Mrs Evans

I am forwarding to you, as promised the list of do's and don't's supplied by the CCW to all our caravan and chalet owners who have premises on the river bank. Along with this list is a photocopied list of signatures to prove that these caravan and chalet owners have ~~all~~ each received a copy of this list and signed for it.

Having read the paper of recommendation for the four planning applicants I note that one of the problems is the fact that although I am signing up for Glastir at the moment the office who made those recommendations voiced concern that Glastir only lasted for 5 years, and it is possible I may change my mind after 5 years. Had you studied the farming press you would see that I, along with most other farmers under the new CAP agreement will have to conform permanently with Glastir's entry level requirements, so there is no need for concern on that point.

Our respect for the river ^{and land} goes far beyond any of your requirements - or rules - or regulations. Please be assured of this.

Yours sincerely

George E Goodwin
