NOTES

Green Infrastructure Statement

1.0 It is intended to collect the rainwater from the roof downspout to irrigate the garden. Thus saving mains water.
2.0 The drive and hardstanding will constructed using permeable materials to allow rainwater infiltration minimizing surface run off.
3.0 It is proposed to install two Schwegler 1SP Sparrow Terraces - Brown x , as shown on the East and West elevations. These will be in addition to the two existing bird boxes already affixed to the existing trees situated within the garden.
