Subject: P/2022/0840 - WWTP extension – Maelor Foods

Hi Gwyn

I have been reviewing the documentation on the LPA system for this application and there are a few items to add I feel. This is principally on account of the separate Environmental Permit (EP) variation and associated documentation.

I summarise the additional items as follows:

- Operational NMPv4 Draft Jan'24 (appendix 11 of EP application) – not on LPA file. Refer attached.
- Operational OMPv6 (appendix 10 of EP application) – not on LPA file. Refer attached.
 - o A2.4 – acoustic housing to pumps on ETP, existing and proposed pumps. Refer attached.
 - o A2.5 – acoustic screen to site boundary. Refer attached.
 - o A2.6 – acoustic screen to air scrubber. Refer attached.

As expressed previously, all other items are as per the documentation on the LPA file, are de-minimis and hence not requiring planning approval, or are an item that benefits from a historic permission, e.g. the raising of the screen to the plant area to the left hand side of the front office block.

Description of development to simply be amended to add reference to 'and associated noise mitigation proposals'.

I trust this can be processed accordingly and any consultation progressed.

Regards

Guy
