Subject: P/2009/1009 - Concrete batching plant Llay - additional info

Chris,

This is a query that an objector has raised in respect of the above. The previous application anticipated a total of 66 HGV movements, where as the current application suggests the maximum will be 38. Is there any reason you can give me to explain to members for the approximately 40% reduction in traffic?

Regards

Matthew
