Water
Butt.

Flat pent roof covered with a high quality EPDM rubber roof covering.

Down flow pipe fitted to drain off excess water.

Appropriate guttering to be installed to flow into a water butt with the water to be recycled and used for watering the garden through the year.

Any rain water over and above that cannot be reused in the water butt will be released into the garden which is well draining.

Will run guttering (pipe work) along the back of the summer house to the opposite corner where the water butt will be located.

ECOSURE 280 WATER BUTT PLANTER

Product description: 280 litre water butt with double planter

Stand not included

Product Information

Height	Length	Depth	Weight	Outlet	Bowl depth	Bowl capacity	Reservoir capacity
920mm	1100mm	340mm	25kg	¾" BSP	2 x 145mm	2 x 17 litre	280 litre

PRODUCT NOTES:

- Site on a flat, level base
- Use supplied spade bit to fit rainwater diverter, below the bottom of the planter bowls
- Raise water butt planter, ensuring it is supported along its entire length (e.g. on courses of bricks, concrete block plinth, level railway sleepers)
- Fit bib tap to fill a watering can.

Sizes approximate, owing to shrinkage

PRODUCT DETAILS:

- Available in a variety of colours to suit location
- Slimline design
- 2 x planting bowls for all year round interest
- ¾" brass threaded outlet moulded into the tank
- Comes complete with standard downpipe diverter and brass tap

OPTIONAL EXTRAS:

- Guttermate filter diverter
- Metal stand

BENEFITS:

- Frost proof in winter; plastic will not crack
- Slimline design - ideal when space is limited
- Shape maintained when full of water
- Robust, heavy duty product; industrial strength
- Opaque plastic reduces algae growth in sunlight
- Colour samples available upon request
- Rotationally moulded for strength & durability
- 2 year warranty against manufacturing defects
