Hi Sharon,

Please find attached a floor space plan of existing and proposed buildings along with a site plan.

From our calculations the total floor space is 625m squared which, allowing 1 parking space per 25m square, would require 25 car parking spaces on our site.

We originally applied for planning permission for a car park with 18 spaces and we also have additional parking space near our main nursery buildings.

We hope that this information is all you require and please contact us if you have any further queries,

Thank you in advance,

Rachel Lloyd and Kim Jones
