☒ Interested Party/Person Correspondence

☐ Other

YOUR COMMENTS ON THE CASE

As Horticulture Wales, based in Wrexham Glyndwr University, we wish to convey our complete support of this project which will deliver a state-of-the-art low carbon horticulture project in Wrexham. It will deliver 150 clean and green jobs to the local area, sequester heat and CO2 from the nearby Welsh Water site and will deliver a world first in terms of design. We see a future where 5-Fords and Wrexham are viewed as exemplars in low carbon fresh produce production, leading the way in delivering tangible solutions to delivering Net Carbon Zero and betterment for future generations; our hope now being this vision is shared by those hearing this appeal. In line with Welsh Governments Well Being of Future Generations Act and the declared Climate Crisis this project has one of the best opportunities of making a positive impact for Wales as a whole, but particularly for Wrexham and its inhabitants.
