Views of officer:
Principle of Development
Due to the setting and scale of this proposal it is likely to be supported this is because no significant concerns are apparent.
Design & Historic Environment
Due to the surrounding historic environment, we also conferred with the conservation officer who had the below comments to add: -
To minimise the visual impact from the street, we recommend reducing the height of the new fence as much as possible—ideally so that it, at least visually, sits behind/below the front boundary wall.
We also advocate for the use of a hardwood material, such as larch, which, if left untreated, will weather to a natural grey. This will help the fence blend more effectively with the surrounding masonry and further reduce its visibility.
These suggestions should be considered and referred to within any future application to utilise this replacement scheme and the opportunity it presents.
Overall Conclusion
I can confirm planning permission will be required for the proposed development. This statement is based upon the legislation mentioned above and the information provided within this enquiry.
A planning application will enable a full assessment to be made with regards to the potential impact of this development within this setting.
This advice is based on the planning policies, guidance and circumstances that apply at the time of this response. This advice may not be relevant may should policies or circumstances change before a formal planning application is submitted. You should also note that the above comments are the informal views of an Officer of the Council and do not commit the Council in the determination of any formal planning application.
