BASEMENTS: Brown Long Eared bat, Daubenton's bat, Natterers bat, Whiskered bat, Common pipistrelle and Pond bat

ATTICS/STABLES: Common pipistrelle, Whiskered bat, Brown Long-Eared Bat, Daubenton's bat, Natterers bat and Pond bat

SITING:
The bat box can be placed on both a tree or a façade. Preferably choose a sunny spot but do not place the box in artificial light and avoid placing where the rain can directly access the box.

To hang, remove the front of the box by unscrewing the bolts with the Allen key. The bracket is then attached to a wall to the rear of the box's location using the supplied screws and the box can be carefully placed onto the bracket. When replacing the front, ensure the bolts are not overtightened but are securely replaced.

Preferably hang several boxes together and when placing in bunkers, cellars, attics and stables, place the boxes as high as possible against the façade or posts - they should be hung at a minimum height of 3 metres (approx. 10 feet).

The box is supplied with: hanging Bracket (width 11cm, height 2.7cm, depth 6.5cm), 2 bracket fixing bolts, 2 washers, 2 raw plugs, 2 coach bolts and an Allen key.
