Details of the pre-application advice received

Pre-application advice confirmed that installing approximately 20 kWp of photovoltaic panels and four solar thermal collectors on the rear roof slopes of the mosque would require a full Planning Application. The comments suggested that the visual impact on the Grosvenor Road Conservation Area would be minimal, as the equipment is located on rear-facing roofs with limited public visibility. The conservation officer considered the design to be appropriately matched to the building and surrounding townscape. No concerns were raised regarding neighbouring amenity or highway impacts. Officers advised that the planning application should include a Net Biodiversity Benefit measure, such as bird or bat boxes, and a Green Infrastructure Statement outlining existing site features and any proposed enhancements. Validation requirements identified include full application forms, plans at the required scales, a roof plan, and a written assessment of the impact on the conservation area.
