I love those lights, nice directional down lighters thank you. I will use that when I am recommending lights to other people.

Swallow boxes look OK

Can you indicate the sparrow terrace and Schwegler 1b in the garden area??

It is always advisable to use “will” rather than “should” apparently.. so Natural England tell me

Schwegler position looks OK too.

Can you show raised ridge tiles or ridge access tiles along the ridge of the barn and indicate a strip of Bitumen Hessinan lining 1F (BS747) will be used along the ridge too please (Section 6.1 25) please.
