[redacted]

Thank you kindly for the response and information.

I've attached 2 different sets of information regarding the technical data for the proposed garage door.

The dimensions of the door are 92in wide and 75in high. And as per the 2nd request, I can confirm that no alterations or building work will be made to the existing structure, as the garage door will be made to measure and manufactured to fit the current recess.
I've also attached a copy of the letter from the company that will be supplying and fitting the garage door. It states the work that's to be carried out, which confirms no alterations will be necessary.

Regards

[redacted]
