Site Boundary

27m Stack Location

2km radius around Site Boundary

Viewpoint Locations

Zone of Theoretical Visibility

27m high Stack Area of Visibility - according to DSM data

27m high Stack Area of Visibility - according to DTM data

NOTES:

1. Zone of Theoretical Visibility has been generated using Welsh Government LiDAR 2m digital terrain model (DTM) data, a bare earth model, and Welsh Government LiDAR 2m digital surface model (DSM) data, which takes account of screening effects from vegetation and buildings.

2. ZTV generation has allowed for the curvature of the earth and light refraction.

3. ZTV has been generated based upon an observer eye height of 1.7m above ground level.

4. ZTV has been generated using a proposed Stack height of 27m.
