RPT1 - REPORT REVIEW

Report 'Kronospan 132kV Cable Installation, Framework Construction Environmental, Management Plan' Ref: 5185-01-01 Rev 1 Dated January 2026 by AXIS P.E.D. Ltd.. Has considered dust and noise from the proposal:

Dust is discussed in section 3.4 where a scheme of mitigation has been proposed in accordance with e Institute of Air Quality Management (IAQM) guidance. These proposals are accepted and I recommend this scheme be required by condition on any planning permission.

An outline of construction noise mitigation methods is discussed in section 3.5. However, there is insufficient detail as to the likely level of disturbance to nearby sensitive receptors and detail as to h proposed mitigation. I therefore recommend the applicant be required to provide a detailed construction noise management plan prior to commencing the development, for approval by the LPA.
