Dyddiad/Date: 23 February 2026

Annwyl Syr/Madam/Dear Sir/Madam,

BWRIAD/PROPOSAL: Change Of Use Of Land And Siting Of 3 Glamping Pods

LLEOLIAD/LOCATION: Land To The East Of Park Lane Court, Parkside, Rossett, Wrexham, LL12 0BQ

Thank you for consulting Cyfoeth Naturiol Cymru (CNC)/Natural Resources Wales (NRW) about the above, which we received on 02 February 2026.

We have concerns with the application as submitted because inadequate information has been provided in support of the proposal. To overcome these concerns, you should seek further information from the applicant regarding protected sites. If this information is not provided, we would object to this planning application. Further details are provided below.

Protected Sites

We note the application site is within the catchment of the River Dee Special Area of Conservation (SAC). In line with our *Advice to Planning Authorities for Planning Applications Affecting Nutrient Sensitive River Special Areas of Conservation* (28 June 2024), under the Habitats Regulations, Planning Authorities must consider the impact of proposed developments on water quality within SAC river catchments. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

We note from the information submitted that a package treatment plant is to be installed to provide foul drainage for the siting of 3 glamping pods. The development has the potential to increase the amount of nutrients being discharged from the site. We note that the Nutrient Neutrality Assessment and Mitigation Strategy (NNAMS) Land at Park Lane Court, Parkside Rossett, Reference: 2500117-ENV-01-OT-TR-E-0001, dated 19/11/2025 advises that percolation tests have been carried out on site, however these have not been submitted with the application. We advise you to seek further information as identified in the section titled

'What does this mean for development proposals involving private sewage treatment systems' of that Advice.

The following information needs to be submitted:

- Percolation Tests

Ultimately, the suitability of foul drainage arrangements for the proposed development is a matter for your Authority to determine. We therefore advise you to take the above into account in your determination of whether the development is likely to have a significant effect on the SAC. Should you determine that an Appropriate Assessment is required, the Applicant will then need to submit whatever evidence they deem appropriate (seeking advice from consultants as may be necessary) to demonstrate no adverse effect on site integrity.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our website. We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our website for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully

Lisa Jones
