Dear Sir / Madam,

Thank you for consulting Natural Resources Wales on the above application.

We have reviewed the planning application submitted to us, and from the information provided we do not consider that the proposed development affects a matter listed on our Consultation Topics, *Development Planning Advisory Service: Consultation Topics* (September 2018): https://naturalresources.wales/guidance-and-advice/business-sectors/planning-and-development/our-role-in-planning-and-development/our-role-in-planning-and-development/?lang=en. We therefore do not have any comment to make on the proposed development.

Please note that our decision not to comment does not rule out the potential for the proposed development to affect other interests, including environmental interests of local importance.

The applicant should be advised that, in addition to planning permission, it is their responsibility to ensure that they secure all other permits/consents relevant to their development.

With regard to foul drainage arrangements, the developer/applicant should ensure that the existing septic tank has sufficient capacity to accommodate any increase in flows from the proposed development.

Applicants wishing to operate a private sewerage system will need ***either*** to apply to us for an environmental permit ***or*** register with us for an exemption from the permit requirement. Septic tanks and small sewage treatment works that meet certain criteria may be registered as exempt.

A step by step guide to registering an exemption can be found here: Natural Resources Wales / Water discharge and groundwater activity exemptions.

We trust that the above comments are of assistance however, should you have any queries, please do not hesitate to contact me.

Kind Regards
Rachel Burke
