'Share & Save' Marketing Before photo taken? YES/NO

DECLARATION	Are you the Registered Owner of the property	Yes	No

The Surveyor has discussed the Survey in full and I agree to the designs and all other details finalised during his visit. I confirm all special requirements and information relevant to the order, including everything that was discussed with the salesperson, has been disclosed. I therefore authorise the Company to proceed with the manufacture in accordance with my preferred delivery requirement and the terms and conditions of the contract.

I also confirm that the Anglian Representative has explained and demonstrated, with samples, where colour differences may occur in placing this order. I accept the products and accept that I cannot use the colour difference as a reason to reject the goods or cancel the contract at a later date.

Structural Defect Report - List below any visible External/Internal defects

CAN ONLY HAVE SECONDARY

PLEASE NOTE: It is not always possible to identify if lintels are present when the existing windows/doors are in situ. If at point of install it is found that the structure is unsupported/compromised then it may be necessary for lintels to be installed. Should this be the case then additional costs will apply to the customer in order to make the aperture structurally sound.

General Notes / Special Requirements

Variation Of Contract		
Designs changed from Contract	Yes	No
Plus/Minus costs apply and have been agreed with the customer (As shown below)	Yes	No
NOTE: If agreement on costs is not reached, this order will be referred to Business Approvals for assessment

Surveyor's Signature: [redacted] **Date:**

Confirmation of Survey - General

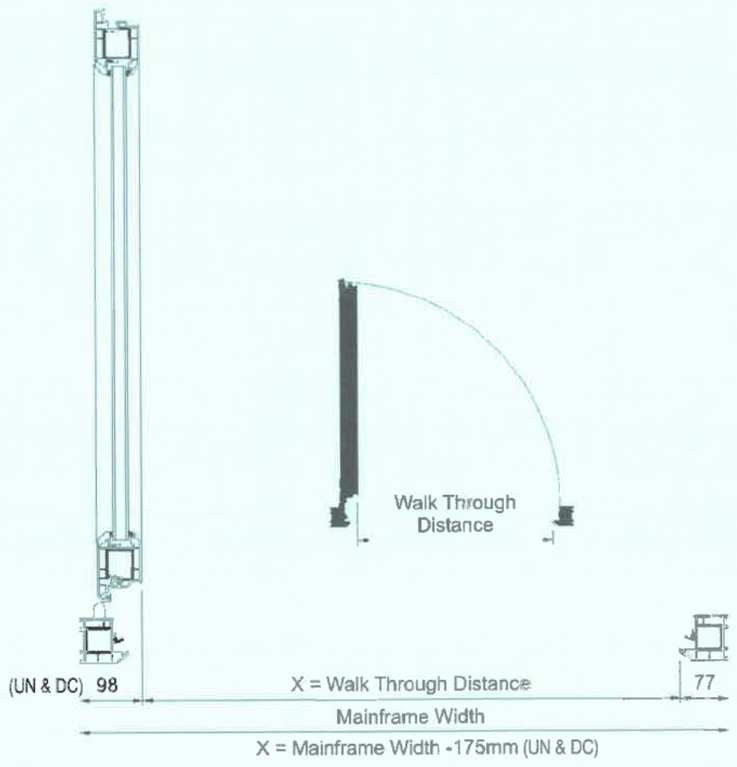

In order to ensure that products are installed correctly, it is sometimes necessary to use frame extensions.

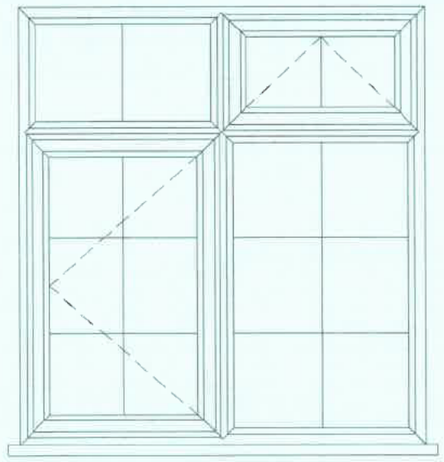

This avoids the frame being too far behind the internal reveals, or to allow the products to function properly, or to keep within size parameters.

The use of frame extensions is a necessary and acceptable common practice within the industry, and the purpose of these diagrams is to provide awareness and demonstrate the principle to the customer.
