Our Ref: CAS-305480-G7R3

Your Ref: P/2026/0207

Wrexham County Borough Council
The Guildhall
Wrexham
LL11 1AY

Dyddiad/Date: 07 May 2026

Annwyl Syr/Madam/Dear Sir/Madam,

Bwriad/Proposal: Dymchwel yr estyniad presennol, adnewyddu'r estyniad presennol a'r estyniad cefn unllawr / Demolition of existing extension, renovation of existing extension and single storey rear extension

Lleoliad/Location: Pickhill Farm Cross Lanes, Wrexham, LL13 0UL

Thank you for consulting Cyfoeth Naturiol Cymru/Natural Resources Wales (NRW) about the above, which we received on 09 April 2026.

We have **concerns** with the application as submitted because inadequate information has been provided in support of the proposal. To overcome these concerns, you should seek further information from the applicant regarding **protected species.** If this information is not provided, we would object to this planning application. Further details are provided below.

Protected Species

We note that the ecology report (Preliminary Ecological Appraisal, Pickhill Farm, reference PR-0427-24, dated February 2025, Tyrer Ecological Consultants Ltd) submitted in support of the above application has identified great crested newts (GCN) to be material to the application site. Section 7.23 of the report recommends that an eDNA survey of pond 4 is required.

GCN and their breeding sites and resting places are protected under the Conservation of Habitats and Species Regulations 2017 (as amended) and Schedule 5 of the Wildlife and Countryside Act 1981. Where GCN are present and a development proposal is likely to contravene the legal protection, they are afforded, the development may only proceed under licence issued by Natural Resources Wales, having satisfied the three requirements set out in the legislation. A licence may only be authorised if:

i. The development works to be authorised are for the purpose of preserving public health or safety, or for other imperative reasons of overriding public interest, including those of a social or economic nature and beneficial consequences of primary importance for the environment;
ii. There is no satisfactory alternative; and,
iii. The action authorised will not be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in its natural range.

To avoid developments with planning permission subsequently not being granted a licence, the Local Planning Authority should take Planning Policy Wales and Technical Advice Note 5 into account when considering development proposals where a European Protected Species is present. Please note, for the purposes of providing advice at the planning application stage, our comments are limited to compliance with the third test only.

We consider that there is currently insufficient information to assess potential effects of the proposal on any GCN that may be present. We concur with the recommendations of the ecological report that further information is required to inform the planning application.

We therefore advise that the information as set out in sections 7.23 and 7.24 of the above report is submitted to assess the impacts of the scheme on GCN and any conservation measures required. This must demonstrate that the proposed development would not be likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in its natural range.

Bats

We note that the information submitted in support of the above application (Dusk Survey Results, Pickhill Farm, reference PR-0427-24, dated January 2026, Tyrer Ecological Consultants Ltd) has identified that bats are present at the application site. From the information submitted, we consider that the proposed development represents a lower risk for bats, as defined in our guidance document 'Natural Resources Wales Approach to Bats and Planning (2015)'.

Bats and their breeding and resting places are protected under the Conservation of Habitats and Species Regulations 2017 (as amended). Where bats are present and a development proposal is likely to contravene the legal protection they are afforded, the development may only proceed under licence issued by Natural Resources Wales, having satisfied the three tests set out in the Regulations (Please also refer to Paragraph 6.3.7 of Technical Advice Note 5: Nature Conservation and Planning). Please note, for the purposes of providing advice at the planning application stage, our comments are limited to the test relating to "demonstration of no detriment to the maintenance of the favourable conservation status of European protected species".

As this is a lower risk case for bats, we consider that the development is not likely to be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in its natural range. We recommend that you discuss the need to secure any avoidance or mitigation measures with your internal ecological advisor.

We advise that the works are carried out under licence. We refer you to the Chief Planning Officer's letter dated 1 March 2018 which advises Local Planning Authorities to attach an informative regarding licence requirements to all consents and notices where European Protected Species are likely to be present on site.

Please note, any changes to plans between planning consent and the licence application may affect the outcome of a licence application.

Protected Sites and Foul Drainage

We note the application site is within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC). In line with our Advice to Planning Authorities for Planning Applications Affecting Nutrient Sensitive River Special Areas of Conservation, under the Habitats Regulations, Planning Authorities must consider the impact of proposed developments on water quality within SAC river catchments. We therefore advise you to consider whether the proposals, as submitted, would increase the volume of foul discharge from the site in planning terms.

We note the application, as submitted, proposes a domestic extension, i.e. an extension to a dwelling house comprising a single household. We refer you to our Advice and the section titled 'What does this mean for domestic extensions?'

Ultimately it is a matter of judgment for you, as Competent Authority, to satisfy yourselves that the proposed development will not result in a significant effect on the SAC.

Other matters

The advice in this letter relates to matters which are included on our consultation topics list. We do not rule out the potential for the proposed development to affect other environmental interests that are not included on this list.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our website for further details.

If you have any queries about the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully,

Rachael Burke
