Play area to comply with;

LEGISLATION

- Health and Safety at Work etc Act 1974
- Occupiers Liability Acts 1957/1984
- Disability Discrimination Act 1995
- Management of Health and Safety at Work Regulations 1999

PLAY EQUIPMENT STANDARDS

- BS EN 1176: Playground Equipment (11 Parts)
- BS EN 1177: Impact Absorbing Playground Surfacing
- BS EN 15312: Free access multi-sports equipment

PLAY AREA NOTES

All play equipment and items such as gates, fences, litter bins and seating should be constructed and installed to apply to the requirements of BS EN 1176 Playground Equipment Standards.

Playground Surfacing to follow European Standards EN 1177 Impact Absorbing Playground Surfacing AND bs 7188. Surface thickness depending on the free height of fall of the equipment installed. The free height of the fall of the equipment to be checked by surface manufacturer, before installation.

Equipment manufacturers/suppliers must submit documentary evidence of compliance with BS EN 1176 and BS EN 1177.

Where equipment is unable to meet a standard, an explanation of acceptability or evidence of third party testing by a recognised body or a risk assessment should be provided.

Appropriate test certificates should be obtained by the client indicating that the surfacing meets the impact absorbency requirements for the equipment to be used.

The installer should provide written confirmation that the equipment and surfacing have been installed to the manufacturer's instructions and to the relevant standard where appropriate

Where considered necessary, a post-installation inspection, including indicative surfacing tests, should be carried out by RoSPA or other appropriate body.

P1 Rocker

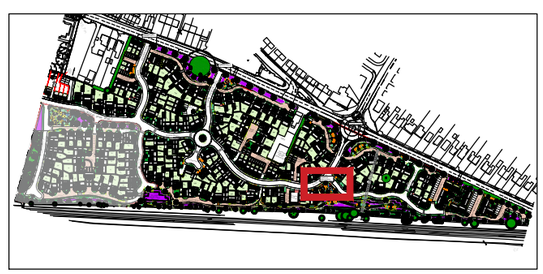

P2 Rocking Fish

P3 Wobbly Sheep
