[redacted]

Hi Phil

Thank you for your email.

Unfortunately, the Scouts and Guides are not able to share data on where potential attendees live due to GDPR restrictions. However, as both organisations operate as local community groups, and with multiple units of each in Wrexham, it is reasonable to assume that most attendees travel only a short distance.

We have updated the survey table presentation as requested. It now clearly shows:

- the number of attendees for each group
- the number of attendee cars parked
- the number of volunteer staff cars parked

At the bottom of the table, you will also find the responses to the question regarding the mode of travel used by attendees when travelling to and from meetings.

I hope this meets your requirements.

Kind regards,

[redacted]
