Appendix A
Redacted copy of sworn affidavit by the applicant, Mrs Sharron Jones (LPA provided with the unredacted original)

Appendix B
Horse passport: Croesiolyn Tiffany Blaze (aka Caprice)

Appendix C
Horse passport: Pharoah

Appendix D
Horse passport: Moonshadow (aka Bo)

Appendix E
Purchase invoice and horse passport: Poppet

Appendix F
Horse passport: Seren

Appendix G
Horse passport: Remy

Appendix H
Bundle of invoices from Wrexham Equine Care

Appendix I
Timestamped photos of horses on the land from 2012 onwards with Google Earth aerial image showing approximate location where the images were taken from

Appendix J
Redacted copy of sworn affidavit by local farrier, [redacted] (LPA provided with the unredacted original)

1 INTRODUCTION

1.1 This planning statement seeks to explain an application made under s191(1) of the Town and Country Planning Act 1990 ("the 1990 Act"), as amended, by Ms Sharron Jones for a lawful development certificate (LDC) in respect of the use of land known as Pen-y-Maes Fields at Pen-y-Cae LL14 1UE for the keeping and riding of horses for personal recreational purposes.

1.2 The application is supported by the following evidence:

- A sworn affidavit by the applicant, Mrs Sharron Jones
- A sworn affidavit by a local farrier, [redacted]
- Horse passports in respect of 6 no. horses kept on the land during the period from 2000 to the present day
- Copy invoices by Wrexham Equine Care (veterinary practice) in respect of visits to Pen-y-Maes Fields in June 2024 and August 2025, and to treat Remy and Poppet respectively
- Timestamped photographs showing horses in the fields.

2 SITE AND SURROUNDING AREA (INCLUDING RELEVANT PLANNING HISTORY)

2.1 Pen-y-Maes Fields is located in open countryside, a little distance to the northwest of and outside the built-up limits of the village of Pen-y-Cae. It comprises a number of contiguous fields that total around 5.3ha. However, the LDC application only relates to just over half of this land (2.8ha), which is owned by the applicant. The remaining land, which is rented, is excluded from the application as it is used for the growing of hay (an agricultural use).

2.2 The application site is accessed from the west via a track that is owned by a local farmer over which the applicant has a right of way and which passes between a small cluster of properties at Trefechan. The northern fields near the access lie on elevated, generally exposed ground with the southern, more fully enclosed, lower land being located alongside Bridge Street.

2.3 The northwestern field immediately next to the track includes a small group of storage containers and other structures that are sited in its southwest corner. There is also a more conspicuously located container/trailer that is raised off the ground. These structures, as well as the keeping of horses, have existed on the land for over 10 years. There is also an old touring caravan on the site.

2.4 There is no known recent planning history in respect of the land.

2.5 A couple of the fields have electric fencing, which has been erected to cordon off grazing areas.

2.6 The land's western boundary adjoins a property that comprises a barn that has been substantially converted into a dwelling, as well as a large rear yard used for commercial open storage purposes.

2.7 Pen-y-Maes fields lie just to the east of the boundary of the Clwydian Range and Dee Valley National Landscape/Area of Outstanding Natural Beauty, with the lower slopes of Ruabon Mountain being located nearby, around 2km to the west.

3 RELEVANT LEGISLATION, CASE LAW AND GOVERNMENT GUIDANCE

The 1990 Act

3.1 S191(1) of the Town and Country Planning Act 1990, as amended, allows a local planning authority (LPA) to certify that existing uses and operations are lawful because they do not involve development (as defined in planning law) or need planning permission; or would benefit from and be within the limitations of an existing planning permission; or because they have become immune from enforcement action as no such action was taken within statutorily prescribed time limits (I have paraphrased).

3.2 With regard to the latter, s171B(3) of the 1990 Act provides that except where there has been a breach of planning control consisting of the carrying out without planning permission of building, engineering, mining or other operations in, on, over or under land, or in the change of use of any building to use as a single dwellinghouse, *"no enforcement action may be taken after the end of the period of ten years beginning with the date of the breach".*

Case Law

3.3 It is settled planning law that for an unauthorised material change of use to become lawful, it must have subsisted continuously, without significant interruption, throughout the requisite 10-year period, such that an LPA was able to take enforcement action should it have considered it expedient to do so.

3.4 Moreover, while there is a requirement that the use must actually exist on the date when an application for an LDC is made, having regard to the judgment in *Panton and Farmer v SSETR* [1999] JPL 461, this does not imply that the use must have been continuous since the date on which it became lawful, following 10 years' continuous use in breach of planning control. To put it another way, provided it can be demonstrated that such a use became lawful at any time before the application for the LDC was

made, and that the use had not been subsequently abandoned by the time of the LDC application (or the use right was lost in any other way in planning terms), a positive certificate should be granted.

3.5 In *Sykes v SSE and South Oxfordshire DC* [1980[1]] and *Fox v First Secretary of State and Kettering BC* [2003] EWHC 887 (Admin), it was held that if horses are kept on farmland primarily for recreational purposes and fed either wholly or mainly by means other than by grazing, a material change of use from agriculture occurred, which would require an express grant of planning permission.

Welsh Office Circular 24/97 *Enforcing Planning Control: Legislative Provisions and Procedural Requirements*

3.6 Among other things, Annex 8 to WO Circular 24/97 explains (again, I have paraphrased):

- the onus of proof in an LDC application is firmly on the applicant;
- the Courts have held that the relevant test of the evidence on such matters is "*the balance of probability*";
- the planning merits of the operation, use or activity, are not relevant to the consideration of the purely legal issues involved in determining an LDC application;
- if the LPA has no evidence of its own, or from others, to contradict or otherwise make the applicant's version of events less than probable, there is no good reason to refuse the application, provided the applicant's evidence alone is sufficiently precise and unambiguous to justify the grant of a certificate, on the balance of probability; and
- the effect of an LDC is similar to a grant of planning permission.

[1] Reported as [1981] 2 All ER 954.

4 EVIDENTIAL DISCUSSION

4.1 Despite comprising a number of fields, the application site forms a single planning unit, serving a sole main purpose and being occupied accordingly[2].

4.2 In light of the judgment in *Sykes*, therefore, as summarised above at paragraph 3.5, in my view the starting point must be to consider whether a material change in the use of the land to use for equestrian purposes has occurred and, if so, does the evidence support the contention that this has either subsisted continuously during the 10-year period prior to the application, or that lawfulness had been acquired during any 10-year period before the date of the application and that it was not subsequently abandoned or supplanted by an alternative use.

4.3 There are currently three horses kept on the land, which are known as Remy (aged 7), Seren (aged 12) and Poppet[3] (aged 13). Further details on these horses are given later. While the number of horses kept at Pen-y-Maes Fields has fluctuated over the years - there sometimes being up to 5 horses at any one time - at least 2 horses have always been kept on the land.

4.4 Both Seren and Poppet have been kept continuously on the land during the 10-year period prior to the date of the application for the LDC.

4.5 As evidenced by the affidavit sworn by the applicant (see Appendix A) and that by her longstanding farrier, [redacted] (see later and at Appendix J), the equestrian use of the land commenced in 1993. At that time, the applicant was married and the land was jointly owned with her then husband. A horse known as Pharoah (owned by the applicant) was being kept on the land as well as another horse called Snowflake, who was on loan. Given how long ago this was, however, the applicant has no

[2] Per *Burdle v SSE* [1972] 3 All ER 240
[3] Throughout this statement I refer to the horses by their common name and not their full registered name.

compelling documentary evidence to link these two horses to Pen-y-Maes Fields.

4.6 However, the horse passport issued by the Arab Horse Society (AHS) of Great Britain on 20 November 1998 in respect of a chestnut mare known as Croesiolyn Tiffany Blaze (aka Caprice: d.o.b. 17/05/1998) does record on page 5 (see Appendix B) that on 7 July 2000 its owner was Sharron Davies of Pen-y-Maes, Trefechan, Pen-y-Cae, Wrecsam LL14 1UE and that on 8 June 2004 the mare was still in the same ownership, albeit that by this time the applicant had married, so the entry refers to Mrs Sharron Jones.

4.7 Page 7 of Caprice's passport records the equine influenza vaccines that were administered to her by various local veterinary surgeons over the period from 5 October 2000 to 5 May 2007, with the address noted as either Trefechan, Pen-y-Cae or Pen-y-Maes, Pen-y-Cae.

4.8 During the following years up to the beginning of 2016, as evidenced by their passports (see Appendices C, D and E), three other horses were also kept on the land: Pharoah (between at least 2002 and 2010), Moonshadow (aka Bo, at least between 2003 and 2013) and Poppet (from 2012, see purchase receipt also included at Appendix E). By this time, any agricultural activity on the land had ceased and a material change of use to the keeping of horses for personal recreational purposes had occurred. This is because, as evidenced by the applicant's sworn affidavit at Appendix A, the horses were being fed either wholly or mainly by means other than grazing.

4.9 During the 10+ years since early 2016 to the date of the application, Seren and Poppet have been kept on the land for the whole of this period, with Remy joining them in 2019. Copies of the passports for Seren and Remy are included as Appendix F and Appendix G respectively.

4.10 I am told that vaccinations have not been kept up since 2022 as the applicant is not planning on taking the horses anywhere where they would come into contact with other animals. However, from time to time, the horses have required other veterinary treatment on-site. At Appendix H is a

bundle of invoices from Wrexham Equine Care (veterinary surgeons) in respect of visits made to Pen-y-Maes Field to treat Bo (in 2018), Seren (in December 2020), Poppet (in September 2021 and August 2025), Caprice (in October 2021, December 2022 and July 2023) and Remy (in June 2024).

4.11 The photographs at Appendix I show various horses on the land from 2012 onwards, including Poppet and Seren who have been continuously kept at Pen-y-Maes Fields for over 10 years, since before 2016. Also included in the appendix is an aerial image from Google Earth showing the approximate position from which each photograph was taken. These images confirm that the horses were kept across the whole of the land subject of the application for the LDC, which as I have already explained comprises a single planning unit.

4.12 In addition to the documentary evidence already described, and as already mentioned, at Appendix J is a sworn affidavit by a local farrier, [redacted] who has visited the land regularly since horses were first kept there, to trim, treat and shoe the horses. His affidavit confirms that the land has been used for the keeping of horses since 1993.

5 CONCLUDING REMARKS

5.1 Drawing the threads of the previous analysis together, and having regard to relevant case law and planning guidance, it is contended that the submitted evidence is sufficiently precise and unambiguous to demonstrate on the balance of probability that the land has been used for equestrian purposes, in the manner described in the application, and that this use has subsisted continuously for at least 10 years until the date of the application (without significant interruption), during which time the Council could have taken enforcement action should it have considered it expedient to do so.

5.2 We therefore respectfully request that the local planning authority grants an LDC in the terms sought.

APPENDIX A

SWORN AFFIDAVIT BY MRS SHARRON JONES
(REDACTED COPY)

SWORN AFFIDAVIT
TO SUPPORT AN APPLICATION
FOR A
LAWFUL DEVELOPMENT
CERTIFICATE
relating to Pen-y-Maes Fields,
Trefechan, Pen-y-Cae, Wrexham
LL14 1UE

I, **SHARRON JONES**, of [redacted] do make oath as follows:

1. I make this sworn affidavit in support of an application for a Lawful Development Certificate relating to the use of land known as Pen-y-Maes Fields, Trefechan, Pen-y-Cae, Wrexham LL14 1UE, as shown edged red on the plan attached to this affidavit and marked **Exhibit A** ("the land"), for the keeping and riding of horses for personal recreational purposes.

2. I acquired the land in 2016 following the divorce from my husband.

3. Since 1993, I have used the land continuously for the keeping of horses and for no other purpose. There has been no farming activity on the land since that time.

4. Currently, I keep three horses that I own on the land. Since, from time to time, I have allowed friends to also keep their own horses on the land, the number of horses has fluctuated over the years, resulting in up to 5 horses being kept at any one time. However, there have always been at least 2 or 3 horses on the land.

5. The horses are fed mainly by hay that is grown on the adjoining land I rent from a local farmer. When I do not have a sufficient crop of hay, I have to buy bales from elsewhere to make up the shortfall. The hay is supplemented by specialist feed that I either buy online or from a retailer in Chirk, should any of the horses begin to lose weight or become unwell. For a few months only during the year, the horses are fed exclusively by grazing in the grass paddocks.

6. As I live nearby in the village, I usually visit the land at least once a day to feed the horses, check their coats during winter, maintain fences and gates, check the water supply and groom the horses as appropriate. When I unable to do that, because I am away or working, I pay a local teenager in cash to carry out these duties. Often, I (or a substitute, when I am unavailable) will visit the land a second time during the day to check on the horses, feed them again and clear up any horse muck deposited in the fields that have been used.

7. Other equine activities include me riding the horses on the local bridleways, training the horses to wear a saddle and tack, and training them to enter and exit a horse trailer.

8. Food, tack and all equipment associated with the keeping of the horses is stored in containers that have been stationed on the land for over 10 years.

9. Up until 2022, all the horses kept on the land were regularly vaccinated by local vets to protect them from equine flu and tetanus, with such vaccines always being administered at Pen-y-Maes Fields. This has only ceased in recent years as I have no plans to take the horses anywhere where they would come into contact with other animals.

10. During all the years I have kept horses on the land a local farrier has visited them regularly to trim the horses' hooves and to put on/replace horseshoes when needed. Veterinary surgeons have also visited when a horse becomes unwell.

I make this affidavit based on my own knowledge

This document is a passport for use as a travel document and veterinary record: it
not a registration certificate nor does it constitute proof of ownership.

GENERAL INSTRUCTIONS

1. This passport is the property of The Arab Horse Society which retains the right t
recall it at any time and for any reason.

2. Damage to the spine invalidates the passport. Damaged passports must b
returned to The Arab Horse Society.

3. Losses of passports must be reported immediately to The Arab Horse Society.

4. This passport must be returned to The Arab Horse Society in the event of:

   a. Change of ownership
   b. Change of colour or markings of the horse
   c. Gelding or change to breeding stock status
   d. Death of the horse
   e. Damage to the spine of the passport.

5. This passport is issued to ensure that the horse can be identified and each perso
recording veterinary or other information must check the identity of the horse fro
the integral sketch and description of the animal.

6. On change of ownership, the new owner is to certify on page 5 that the marking
on the horse match those described in this passport.

7. Queries relating to this passport must be made in the name of the horse not b
registration or passport number as The Arab Horse Society's records relate to horse
names.

ENDORSEMENT OF ACCEPTANCE
BY OWNERS, TRAINERS, APPOINTED AGENTS OR LESSEES

Confirm that the markings of the horse agree with those shown in this passport, and that the details on the front page are correct, then endorse your acceptance below.

RECORD OF EQUINE VACCINATION

This document should be held by the owner/keeper of the animal described overleaf and must be presented whenever proof of vaccination is required. **Please keep the document in a safe place** as failure to produce it may result in the animal being debarred from a showground, stables or event site.

The document must be passed to the new owner when the animal is sold.

The Veterinary Surgeon carrying out a vaccination should check the identity of the animal against the diagram and description overleaf before signing the form.

Name of owner	Address of owner
[redacted]	

N.B.: this record is not for use under the Rules of Racing or the Conditions of the General Stud Book.

APPENDIX D

HORSE PASSPORT – BO

This passport, issued by the Pleasure Horse Society Ltd on 20 October 2003 to the applicant in respect of a black gelding known as Evelyn's Moonshadow (aka Bo: d.o.b 1998), notes the keeper as Sharron Jones of Pen-y-Maes, Trefechan, Pen-y-Cae. It also records the equine flu and tetanus vaccinations given by D.P.Harrison MRCVS of Rhyd Broughton Vet Centre Wrexham on various dates between 2002 and 2004, with subsequent vaccinations administered by other veterinary surgeons during the period from 2005 to 2013. Although the name of the place where the vaccines were given varies between "Wrexham" and "Pen-y-Cae", since veterinary surgeons never request that horses be transported to their surgeries for vaccination, these all took place at Pen-y-Maes Fields.

Bo

PLEASURE HORSE SOCIETY LTD.

EQUINE PASSPORT

The Pleasure Horse Society is an approved Passport Issuing Office

Sections I, II & III – Details of ownership and horse

Sections I, II & III – Details de droit de properieté et cheval

For competitive purposes the nationality of the horse is that of its owner.

Pour le competition, la nationalite du cheval est celle de son proprietaire.

On change of ownership the passport must immediately be returned to the issuing organisation giving the name and address of the new owner for re-registration and forwarding to the new owner.

En cas de changement de proprietaire le passport doit etre renoye immediatement a l'orgisme de delivrance du passport donnant le nom, l'adresse du nouveau proprietaire, a fin de proceder a un nouvel enregistrement a fin de le lui transmettre.

If there is more than one owner, or the horse is owned by a company, then the name of the individual responsible for the horse must be entered in the passport together with his nationality.

S'il y a plus d'un proprietaire ou si le cheval apparient a une societe, le nom de la personne responsible du cheval doit etre indique sur le passport ainsi que sa nationalite.

When the Federation Equestre Internationale approves the leasing of a horse by a national equestrian federation, the details of these transactions must be recorded by the national equestrian federation concerned.

L'orsque la Federation Equestre Internationale approuve la location d'un cheval par une Federation Nationale. Les details de ces transactions doivent etre enregistres par la Federation Equestre Nationale intressee.

The passport is issued to ensure that a horse can be identified at all times. It must always accompany a horse.

Le Livret signaletique ou passport est emis pour pouvoir identifier un cheval a tout moment. Il doit accompagner le cheval dans tout ses deplacements.

Each official should check the identity of the horse from the markings contained in the passport.

Chaque personne qui recoit le livret signaletique doit verifier l'identite do cheval grace aux marques distinctives indiquees dans le livret.

The passport must be returned to the Passport Issuing Organisation when the horse changes ownership, address or dies / is put down.

Le livret doit etre retourne a l'authorite ayant delivre le passeport après tout changement de proprietaire, d'adresse ou suivant son deces.

If the passport is lost the Passport Issuing Organisation must be notified immediately.

En cas de perte du passeport, l'orgisme ayant delivre le passeport doit en etre immediatement informe.

Identification procedure: The above identification must be completed by a Veterinary Surgeon only.

The recommended procedure for identification is described in the F.E.I. booklet 'Identification of Horses'.

The diagram and written description must agree and must be sufficiently detailed to ensure the positive identification of the animal in future. White markings must be shown in red and the written description completed using **black ink in block capitals or typescript.** If there are no markings, this fact must be stated in the written description.

All head and neck whorls should be marked ("X") and described in detail. Other whorls should be similarly recorded in greys and in animals lacking sufficient other distinguishing marks. Acquired marks (" ") and other distinguishing marks, e.g. prophet's thumb mark ("Δ"), wall eye, etc., should always be noted.

Age: In the absence of documentary evidence of age, animals older than 8 years may be described as "aged".
