Q9. Has the development been completed?
Yes

Q10. Was the licence implemented? (If you have not implemented your licence, the licence is declared a nil return and no further information will be required within this report. You will be required to sign and date the declaration at the end and submit the form).
Yes

Data and Records

Q11. Local Biological Records Centre Natural Resources Wales advises all biological data associated with this licence is shared with your Local Biological Records Centre. Please contact your local records centre directly via the website (opens in new tab). Please confirm if the records associated with this licence have been sent to the local records centre.
Yes

Q12. National Recording Schemes Natural Resources Wales advises all biological data associated with this licence is submitted to a national recording scheme in addition to it being shared with your Local Biological Records Centre. Please confirm if data has been uploaded to a national recording scheme and that data is also accessible to Natural Resources Wales and Local Records Centres.
Yes

Species Report Selection

Q13. Which actions do you wish to report on (select all that apply)?
Licensed Actions - Animal species

Summary of Licensed Action Taken: All Animal Species - Action 1

Q14. Action 1: What animal species was affected?

	Select from the list
Species:	Bat - Common Pipistrelle

Q15. Date(s) when action taken (DD/MM/YYYY)

From 06/11/24

Until 06/11/24

Q16. What activity was undertaken (select all that apply)?

Destroyed a Breeding Site or Resting Place

Q17. Location information where action was taken:

Location (6 or 8 figure grid reference) SJ 36028 55395

Area (site size) 0.2

Q18. Animal information (select all that apply)

Adult

Number (individuals)
1

Q20. Add more actions?

No

Species Report Selection

Q83. Do you wish to report on Incidental Capture or Killing for any animal species?

No

Species Report Selection

Q103. Do you wish to report on action taken for any Plant Species?

No

Delivery of the Commitments in the Licensed Method Statement.

Q133. Reporting of Condition 3 of the licence: Works Undertaken

Report against what action has been taken on site and reference how this compares to the agreed works as written in the Method Statement. This answer must be specific to reflect what was written within each of part of Section E of the Method Statement.

Any variation to the commitments made under the licence and a justification for these must be given.

Two bat boxes were installed on prior to any works to the building.

The named ecologist (Mel Reid) attended site on 06/11/23. A toolbox talk was given to the two contractors completing the works. following this the named ecologist carried out an inspection of the known roosting location (eaves) using a torch and endoscope from scaffolding. No bats were found during this pre-works inspection, however two droppings were noted on the wall below the eaves consistent with a pipistrelle species.

The roof tiles and eaves were then removed under supervision by the named ecologist. No bats were found during this soft-strip. The works were supervised until the risk to roosting bats was acceptably low (i.e. all roof tiles in this area removed). The rest of the roof was then stripped by hand. No bats or further evidence of bats was found.

Q134. Post-development Site Safeguard

Describe works to manage/maintain the population post-development, to reflect what was written in Section F of the Method Statement.

Who will be responsible for management and maintenance, site/structure ownership and monitoring the development of any habitats?

No post development monitoring was proposed due to the low conservation value of the roost.

The two proposed bat boxes have been installed correctly on trees on site. These will be retained in perpetuity and replaced should they ever fall down or become damaged.

Photographs

Q136. Confirm if photographs are being submitted by a separate document (e.g. ShareFile Link)

No

Q137. Describe what the photographs are indicating/demonstrating/verifying.

Bat Box 1 - bat box within tree
Bat Box 2 - bat box within tree

Document Check

Q138. Please select the documentation you have attached with this application (select all that apply).

Photographs (required)

Q143. Upload report photographs as stated in Condition 11 of all licences using the button below. Please ensure all images are saved with a file size less than 5MB
• File: Bat Box 1.jpg - Download • File: Bat Box 2.jpg - Download

Declaration

Natural Resources Wales have my permission to store, copy, use, release and publish the biodiversity records I have supplied, including my name as part of the record, in line with the provisions of the licence under which the collection of these biodiversity records was authorised.
Yes

Data Protection

I have read and understood this information.
