Good afternoon,

Thank you for consulting us about the above application which we received on 17 June 2026.

The application site for this proposal is located within the catchment of the River Dee and Bala Lake Special Area of Conservation (SAC).

We refer you to section 9 of our Advice to planning authorities for planning applications affecting nutrient sensitive Special Areas of Conservation titled "What does this mean for development proposals involving connection to public wastewater treatment works?"

We note this application proposes construction of an outdoor covered cricket facility, entrance building, associated parking and 8 additional toilets. The application proposes connection to the public foul sewer.

Please can you confirm if your Authority would view this proposal as generating an increase in nutrient discharge into the River Dee and Bala Lake SAC?

Kind Regards
Shaun Thomas
