Does your proposal involve the construction of a new building which would result in the loss or gain of public open space?

◯ Yes
⊘ No

Description of the Proposal

Description

Please describe the proposed development including any change of use

The proposal is to develop a track along the top edge of the field, as shown in the layout plan. This track is approximately 250 mtrs long and 2 mtrs wide. It traverses the top of the field, across the tree line, and ends at a turning point in the far left hand corner of the field. This turning point will be sufficient to park up to 4 cars in and will also house a brand new agricultural building. This new building will be to house, equip and care for cattle. We aim to have a minimum of 2-3 cows and 2 horses in the central area of the field within the black and red boundary on the layout plan.

In addition to the new agricultural building, it is also intended to temporarily site 2 x 20ft shipping containers (green) in the same vicinity. These units will be used for the storage of farming equipment, tools and plant that will be needed to develop the site for the cattle and also equipment for planting of new tress, as indicated in the layout plan.

These new tress and foliage will be planted to help increase the biodiversity of the site, improve the ecological value of the site, support drainage and provide improved landscaping of the site.

In addition to the new planting, the Urban Long Forest scheme has also approved the site for the planting of hedges and vegetation along the existing right of way. This will help to maintain the right of way, as well as make it clearer on the field where public access runs. This planting will also help to improve the biodiversity on the site and the environmental impact of the land.

Further details of the proposal can be found in the outline document, and the site access report.
