

Window Type A & B Section 1:5

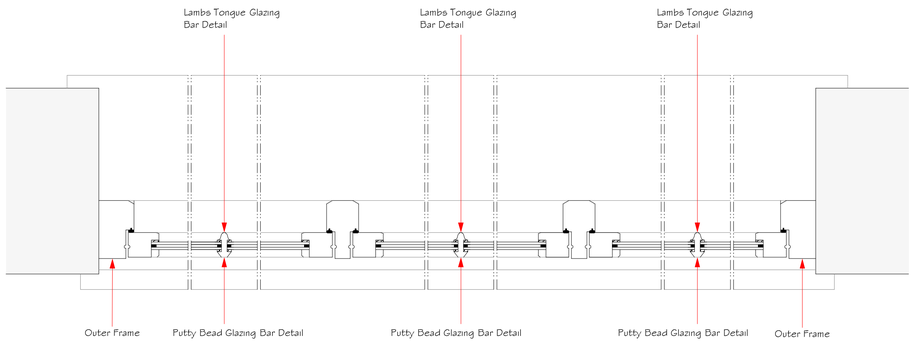

Window Type C Section 1:5

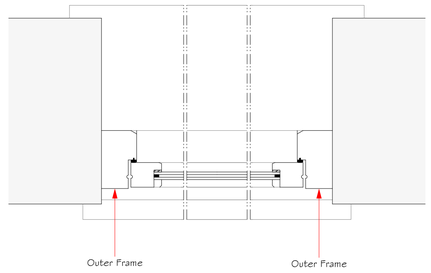

Window Type D Section 1:5

Window Type A & D Plan Detail 1:5

Window Type B Plan Detail 1:5

Window Type C Plan Detail 1:5

WINDOW DETAILS

The proposed windows are to be traditional flush-fitting side hung casement windows, sympathetic in style to the original windows typical of Pickhill Farm.

High-quality, sustainably sourced timber, treated for durability and long-term resistance to weathering and decay. The timber will be finished to a high standard to replicate the character of traditional joinery.

Factory-applied RAL 9016 (Traffic White) microporous paint finish to match white of existing heritage windows on the property, also allowing the timber to breathe while protecting it from moisture and UV degradation.

Double-glazed sealed units using low-emissivity (Low-E) glass to meet thermal performance requirements without compromising historic aesthetics. The glazing incorporates clear glass with no applied tints or patterns.

See Proposed elevations for specified window types
