RPT1 - REPORT REVIEW

The revised report 'Air Quality Assessment Addendum for Revised Emission Limit' Dated 13-07-26 by Fichtner Consulting Engineers has been revised following comments from Natural Resources Wales (NRW) in relation to the Environmental Permit application. It was revised to address:

1. Ammonia levels and in particular its impact on protected ecology areas.
2. Alterations to the emissions modeling
3. In-combination assessment with other ammonia sources.

The report has demonstrated that the conclusions in the original report remain valid which are accepted and I therefore have no objection to this application on the basis of Air Quality.
