Verification of application Evidence

The application is supported by the attached site plan identifying the tree together with a description of the proposed works and photographical evidence. The tree has also been inspected by Mr John Brewin, who has confirmed that the proposed works are appropriate.

The date of the works is to be confirmed, as a suitably qualified contractor will be appointed once consent has been granted. Mr John Brewin advised that he provide a list of approved contractors by email, from which a contractor will be selected to undertake the approved works.
