Decision Date 31/07/2026

2. The development shall only be carried out in strict accordance with the details shown on the following plan(s) and document(s): 1) Accompanying Application Form, 2) Accompanying Site Location Plan - 0156-SL01, 3) Proposed Site Plan - 0156-PR01, 4) Accompanying Location Plan - dated 9th June 2026 and 5) Proposed Details Plan - 0156-PR02.

3. The development hereby permitted shall not be occupied until the measures to deliver net benefit for biodiversity (NBB) shown on the accompanying Green Infrastructure Statement and Net Biodiversity Benefit Form - dated 22nd July 2026 have been implemented in full. The measures shall thereafter be maintained for the lifetime of the development.

4. The materials to be used in the construction of the external surfaces of the development hereby permitted shall match those used in the existing building.

Reason(s)

1. To comply with Section 91(3) of the Town and Country Planning Act, 1990.

2. To comply with Section 71ZA(2) of the Town and Country Planning Act, 1990.

3. To ensure the development delivers net benefit to biodiversity in accordance with paragraph 6.4.5 of Planning Policy Wales 12.

4. To ensure a satisfactory standard of appearance of the development in the interests of the visual amenities of the area in accordance with Policy GDP1 of the Wrexham Unitary Development Plan..

Date Received 09/06/2026

Decision Date 31/07/2026

The proposed development lies within an area that has been defined by the Coal Authority as containing coal mining features at surface or shallow depth. These features may include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and former surface mining sites. Although such features are seldom readily visible, they can often be present and problems can occur, particularly as a result of new development taking place. Any form of development over or within the influencing distance of a mine entry can be dangerous and raises significant land stability and public safety risks. As a general precautionary principle, the Coal Authority considers that the building over or within the influencing distance of a mine entry should be avoided. In exceptional circumstance where this is unavoidable, expert advice must be sought to ensure that a suitable engineering design which takes into account all the relevant safety and environmental risk factors, including mine gas and mine-water. Your attention is drawn to the Coal Authority Policy in relation to new development and mine entries available at:
www.gov.uk/government/publications/building-on-or-within-the-influencing-distance-of-mine-entries
Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Coal Authority Permit. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Failure to obtain a Coal Authority Permit for such activities is trespass, with the potential for court action.
If any coal mining features are unexpectedly encountered during development, this should be reported immediately to the Coal Authority on 0345 762 6848. Further information is available on the Coal Authority website at:
www.gov.uk/government/organisations/the-coal-authority
