Subject: FAO Jenni Perkins RE: P/2026/0475 Former Weighbridge Building, Maesyffynnon Road, Minera

Good morning Jenni,

Regarding the application referenced above.

Information held within the Regional Historic Environment Record (HER) indicates that the proposed demolition of 'former weighbridge building' will remove a building with origins in the early 19th century. Structures are visible on the 2nd edition Ordnance Survey Mapping and in this case we would advise that a **Level 2 historic building survey** is completed on the building to be demolished. This is in accordance with the Planning Policy Wales (Feb 2024) and TAN 24 (March 2026) guidance, and an appropriate condition is supplied below. From photos within documents reviewed during our assessment we note that asbestos may be present in the structure and relevant health and safety mitigations should be followed where necessary.

In addition to this, the building is approximately 35m to the NNE of a scheduled monument and as such consultation with CADW is required to assess the impact the development will have on the setting.

The **Level 2 survey** would include a detailed photographic survey, written descriptive survey, phased plans of the buildings' development and a measured survey using annotated architects plans where these are available, or a new survey where architects plans are not of sufficient detail.

Level 2 Building Recording

Suggested planning condition to facilitate a programme of historic building recording, the equivalent of an Historic England Level 2 building survey, in order to allow an adequate analytical record of the buildings to be made prior to demolition.

Prior to the commencement of works a programme of building recording and analysis, equivalent to an Historic England Level 2 building survey, shall be secured and implemented. This shall be in accordance with a written scheme of investigation which has been submitted by a qualified and competent expert, experienced in understanding historic buildings, and approved in writing by the local planning authority.

The programme of building analysis and recording will be completed in line with the written scheme of investigation discharged as part of the condition. The recording report shall be completed by a competent expert, experienced in understanding historic buildings, and must meet the standards laid down by the Chartered Institute for Archaeologists in their Standard and Guidance for the archaeological investigation and recording of standing buildings or structures.

A copy of the resulting report should be submitted to the Local Planning Authority and the Planning Archaeologist, Heneb: Clwyd Powys Archaeology (The Offices, Coed y Dinas, Welshpool, SY21 8RP). After approval by the Local Planning Authority project data must be submitted and approved for inclusion in the Heneb: Clwyd Powys Archaeology Historic Environment Record. The full digital archive must also be submitted and approved for inclusion within the National Monuments Record, RCAHMW.

Reason: *To allow an adequate analytical record of the buildings to be made, before they are demolished, to ensure that the buildings' origins, use, and development are understood and the main features, character and state of preservation are recorded.*

I have attached a brief for the Level 2 survey and guidance on sources of archaeological contractors who may wish to tender for this work. The chosen archaeological contractor will need to submit a WSI (written scheme of investigation) document to karl.macrow@heneb.org.uk for approval before they can commence works on site.

The attached documents should be forwarded to the applicant/agent so that they are fully aware of the requirements.

Please contact me if you wish to discuss this advice or require more information.

Kind regards,

Karl
