Wrexham
16 Lord Street
Wrexham
LL11 1LG

Date: 25th September 2026
Our Ref: 1003335
Your Ref: P/2026/0543

Grid Ref: 333133,350574
Site: REGENT HOUSE REGENT St WREXHAM, WREXHAM, LL11 1PR
Development: CHANGE OF USE OF FIRST, SECOND AND THIRD FLOORS OF EXISTING BUILDING FROM CLASS B1 (OFFICES) TO CLASS C3 (36 NO APARTMENTS)

We refer to your planning consultation relating to the above site, and we can provide the following comments in respect to the proposed development.

SEWERAGE

We can confirm capacity exists within the public sewerage network in order to receive the domestic foul only flows from the proposed development site.

We can advise that Five Fords WwTW has a phosphate permit. You will need to discuss this matter further with the local planning authority.

With respect to the disposal of surface water flows from the proposed development, we note that there are no alterations are proposed to the footprint of the building or the external areas – all of the conversion works will take place within the existing building and therefore the existing stormwater drainage system will not be affected by the proposed internal changes and no works are required to the existing stormwater drainage system.

Please note that under no circumstances would we permit surface water runoff from the proposed development to be discharged directly/indirectly into the public combined sewerage system.

In addition, please note that no highway or land drainage run-off will be permitted to discharge directly or indirectly into the public sewerage system.

Accordingly, if you are minded to grant planning consent for the above development, we would request that the following **Condition and Advisory Notes** are included within the consent to ensure no detriment to existing residents or the environment and to Dwr Cymru Welsh Water's assets:

We're not-for-profit. Every single penny we make goes back into looking after your water and environment. You can contact us in Welsh or English.

Rydym yn gwmni nid-er-elw. Mae pob ceiniog a wnawn yn mynd i ofalu am eich dŵr a'ch amgylchedd. Cysylltwch a ni yn Gymraeg neu'n Saesneg.

Conditions

Condition 1 – Surface Water

No surface water from any increase impermeable surfaces within its curtilage shall be allowed to drain directly or indirectly to the public sewerage system.

Reason: To prevent hydraulic overloading of the public sewerage system, to protect the health and safety of existing residents and ensure no pollution of or detriment to the environment.

Advisory Notes

The applicant may need to apply to Dwr Cymru / Welsh Water for any connection to the public sewer under S106 of the Water industry Act 1991. If the connection to the public sewer network is either via a lateral drain (i.e. a drain which extends beyond the connecting property boundary) or via a new sewer (i.e. serves more than one property), it is a mandatory requirement to first enter into a Section 104 Adoption Agreement (Water Industry Act 1991). The design of the sewers and lateral drains must also conform to the Welsh Ministers Standards for Gravity Foul Sewers and Lateral Drains, and conform with the publication "Sewers for Adoption"- 7th Edition. Further information can be obtained via the Developer Services pages of www.dwrcymru.com.

The applicant is also advised that some public sewers and lateral drains may not be recorded on our maps of public sewers because they were originally privately owned and were transferred into public ownership by nature of the Water Industry (Schemes for Adoption of Private Sewers) Regulations 2011. The presence of such assets may affect the proposal. In order to assist us in dealing with the proposal the applicant may contact Dwr Cymru Welsh Water. Under the Water Industry Act 1991 Dwr Cymru Welsh Water has rights of access to its apparatus at all times.

In accordance with Planning Policy Wales (Edition 12) and Technical Advice Note 12 (Design), the applicant is advised to take a sustainable approach in considering water supply in new development proposals, including utilising approaches that improve water efficiency and reduce water consumption. We would recommend that the applicant liaises with the relevant Local Authority Building Control department to discuss their water efficiency requirements.

Our response is based on the information provided by your application. Should the proposal alter during the course of the application process we kindly request that we are re-consulted and reserve the right to make new representation.
