- [x] Yes
- [ ] No

Please provide a description of existing and proposed materials and finishes to be used in the build (including type, colour and name for each material)

Type:
Walls

Existing materials and finishes:
N/A

Proposed materials and finishes:
External walls are of a durable one-piece construction. High-performance, low-maintenance, plastisol-coated, galvanised steel cladding offers protection against fire, extreme weather and accidental damage. Internally, the walls are of a polyester-coated galvanised steel, providing an impact resistant, wipe clean finish.

Type:
Roof

Existing materials and finishes:
N/A

Proposed materials and finishes:
Outstanding insulation is provided by the construction of the roof. The roof deck is of one-piece construction and is impact resistant. It is covered with solar-reflective, profiled plastisol-covered galvanised steel to reduce heat gain. Internally, the ceiling is designed to prevent condensation problems. It is covered with the same polyester steel as the walls for a low-maintenance finish

Type:
Windows

Existing materials and finishes:
N/A

Proposed materials and finishes:
Both the fixed and opening windows measure 1.027m wide by 1.027m high, with distinctive square cornered aluminium frames and polyester powder-coated paint finish. Opening windows have lockable handles with keys. The windows are fully double-glazed for excellent thermal and acoustic performance. Tinted glazing reduces solar glare and a thermal break prevents condensation problems

Type:
Doors

Existing materials and finishes:
N/A

Proposed materials and finishes:
Polyester powder-coated fully double-glazed doors minimise heat loss. The aluminium frame also incorporates draught proof weather seals. Protection against theft and vandalism is given by a cylinder mortice lock, which has escape override on the inside. A low-level threshold improves access and can help you to meet the requirements of the Disability Discrimination Act (DDA).
