Net Biodiversity Benefit and Green Infrastructure Statement

Outline planning for one dwelling

Contents

1.0 Net Biodiversity Benefit

2.0 Green Infrastructure Statement

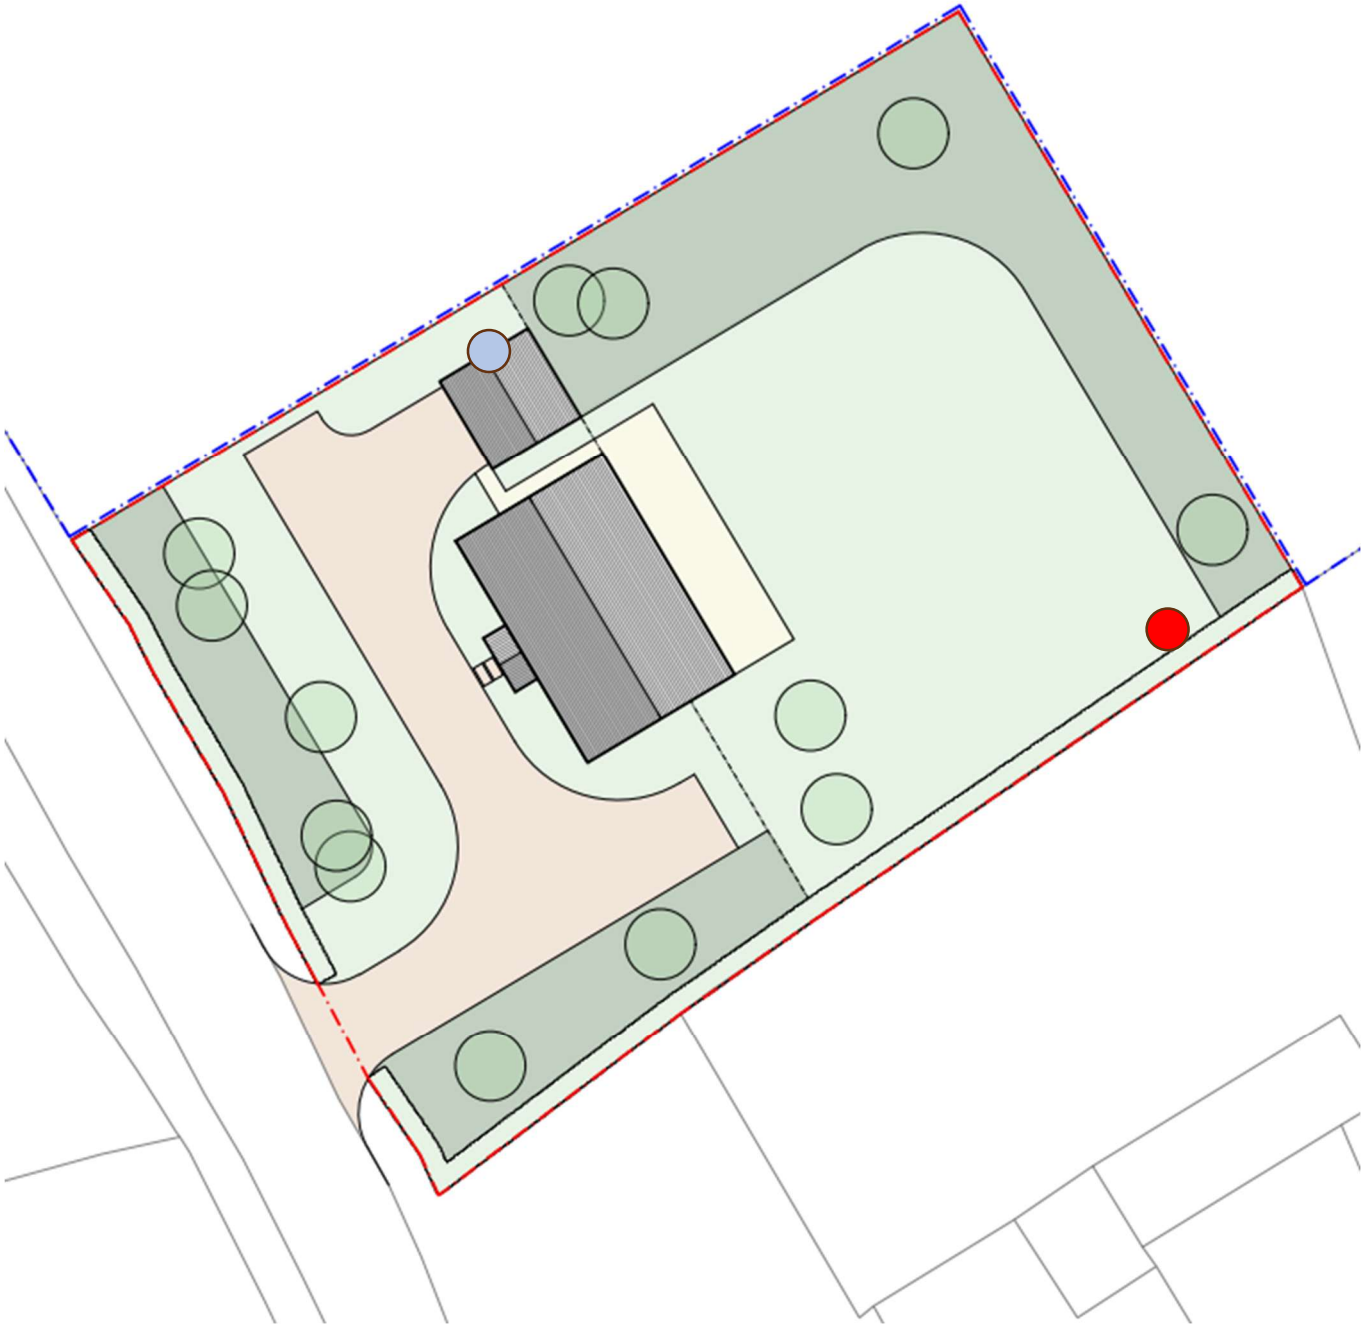

1.0 Net Biodiversity Benefit

1.1 In accordance with paragraph 6.4.5 of Planning Policy Wales 12, all developments are required to demonstrate that provision has been made for net biodiversity benefit (NBB).

1.2 The below indicates the measures which will be taken on site to ensure a benefit to biodiversity is achieved via the proposed application.

1.3 During the design process, we had carefully considered that the proposal did not harm any wildlife or have any negative impact on the biodiversity. Currently, there are no hedgehog holes in the fencing, bat or bird boxes, or log piles.

1.4 To improve the ecology within the boundaries of the property, we will provide a log pile in the position indicated below in red, a bird box in blue, and wildflower planting in green. The log pile will be suitable for invertebrates, small mammals and amphibians. Log pile to be loosely laid in a single direction and held in place with sticks driven into the ground.

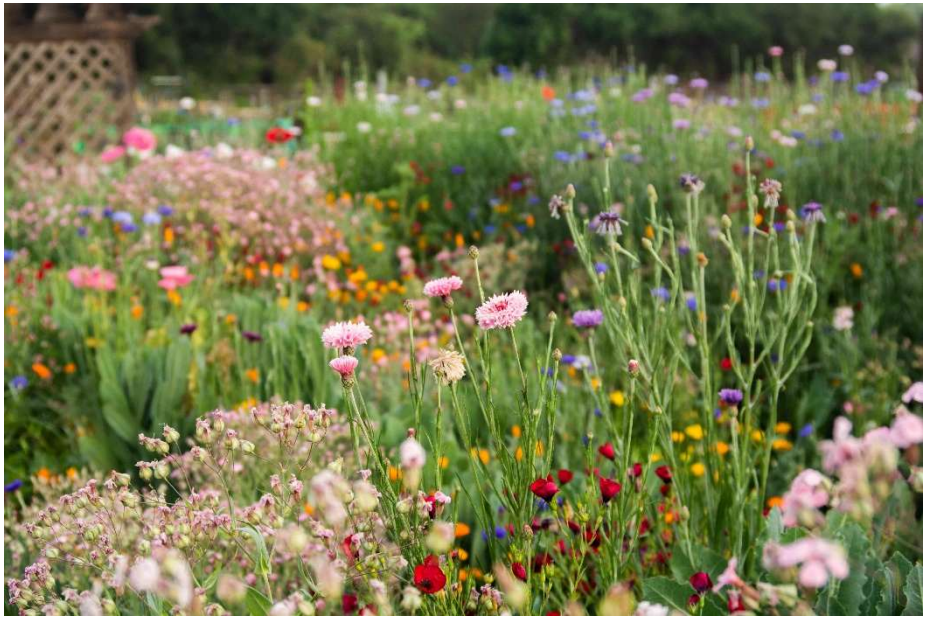

Typical log pile (Red)

House sparrow terrace- wooden (or woodcrete) nest box with 3 sub-divisions to support 3 nesting pairs. Placed under eaves. Entrance holes 32mm diameter. Dimensions: H310 x W370 x D185mm. Also suitable tits, redstarts and spotted flycatchers. Place atleast 2m from Finished Ground Level.

Wildflower planting, spec TBC

2.0 Green Infrastructure Statement

Form completed by:	Jack Felgate
Date:	01.08.2026
Address of site:	Land north of Crabmill Farm, Overton, LL13 0LE
Grid reference:	SJ 37413 39668
Description of Proposal:	Outline planning for one dwelling

1. Details of all existing green infrastructure on site and approximate size:

Boundary 1:	2.0m hedgerow
Boundary 2:	1.5m hedgerow
Boundary 3:	-

2. What green infrastructure features (trees, hedges, hedgebanks) have already been removed from site and/or require removal to facilitate the development (add lengths or areas)?

Boundary 1:	No boundaries to be affected by the proposed development

3. How are the retained features being protected during development (BS5837:2012)?

Boundary 1:	Dwelling is inset of the boundaries, therefore no adverse effect.

4. What Green Infrastructure is being planted as mitigation for losses?

Boundary 2:	See above measures.

5. Biodiversity enhancements

   The enhancements do not need to be directly attached to the proposed new construction; they can be attached to the host dwelling or placed within the garden, but they do need to be on land within the red or blue line. The principle is that the enhancements should lead to a 'net benefit' for biodiversity. The following biodiversity enhancements have also been added: Log pile, bird box, and wildflower planting to be installed to provide the biodiversity benefit.

6. Management and maintenance.

   Any existing hedgrows are to be retained and maintained as usual by the applicant.

7. Conclusion

   Based on the information provided above, this development will result in a Green Infrastructure and Net Biodiversity Benefits upon completion.
