Good afternoon Tyler,

Regarding the planning application referenced above.

Having reviewed the information held within the Regional Historic Environment Record and the documents submitted in support of the application; we have concluded that there are no recommendations to make in relation to the installation of solar panels as the changes will have no negative material effect on any underlying archaeology or known heritage asset. However, as the development is close to the Grade II listed building Min-Yr-Afon (PRN: 14486) the Built Heritage Control Officer should be consulted (CC'd in).

Kind regards,

Karl Macrow
