Good afternoon Tyler,

Regarding the planning application referenced above.

Having reviewed the information held within the Regional Historic Environment Record and the documents submitted in support of the application; as the changes will have no negative material effect on any underlying archaeology or known heritage asset, we have concluded that there are no recommendations to make in relation to the installation of solar panels to the roof, stone cladding and other works.

However, as the development is within 10m of Offa's Dyke: Vron Farm Section (DE113), Cadw will need to be consulted as it may have an impact on the setting of the scheduled monument.

Kind regards,

Karl Macrow
