COLLIERS Park Car Park Survey (October 2026)

Planning Application ref P/2026/0364 for Colliers Park, Wrexham

Wrexham AFC Men's first team began to use the training pavilion on 1 September 2026. Since then, site usage has been established.

In total, there are 89 car parking spaces available on the site.

Following the response from Wrexham Council received on Tuesday 13 October 2026, the club took the next available opportunity on two typical, busy days when the first team were using the Training Pavillion to complete a car parking survey.

Key parameters of the parking survey:

- Survey taken place between 9am and 5pm, being the typical hours of usage for the First team training pavilion for which the application relates (evening activity due to academy use is unaffected by this development).
- Car count taken every 2 hours, which was deemed appropriate to demonstrate the typical activity during the course of the day.
- The count was undertaken by Wrexham AFC Club staff that regularly attend and use the building.
- Car count reflects all users of the site (i.e. no differentiation was made, or possible, between different user groups, and as such, the number of cars includes those for FAW staff and visitors, university, Wrexham AFC Academy and any others).

Critically, all car parking was contained within the site, and no off-site parking was observed.
